

## Ultimate Vibe Systems

### PCTS GT Simulator

Base model :

- Triple 34" Gaming monitor, reaction time 1ms, 144 Hz, with curved screen.
- HDMI Display cable (TV) to Display port (PC).
- GT type simulator structure with genuine safety rollbar tubes or structure designed to receive actuators(cf higher photo).
- 3 Standard monitor stands.
- Keyboard and mouse with stand.
- Tailor-made PC with liquid cooling system.
- Semi-professional Fanatec pedals (elastomer), 90 Kg (180 pounds) loadcell on the brake.
- Rfactor2 :  
a semi-professional simulation software : tyre and chassis flex, rubber deposit, dynamic weather conditions, accurate downforce...
- *Genuine Sparco* wheel on Thrustmaster base.  
(cf photo du haut).

## *Ultimate Vibe Systems*

### *PCTS GT Simulator*

Options to complete the base model :

- Laser technology dynamic Platform (cf first page photo) :  
2000 components allows to moves your structure  
on laterals rails to recreate G-forces and grip losses.  
8040 €
- Compact actuators system engineered by a Airbus  
and Nasa provider. 4800 €
- Triple Vibe system 2400 €  
3 vibes sources are increasing the driver feeling  
to reflect sound, G-forces and grip loss.
- Direct Drive wheel to gain reactivity, precision,  
restitution subtlety.  
2160 €
- 5K VR mask : 1560 €  
This mask allows a 200° vision field,  
a 180Hz refreshing rate, and a 2,5 K reso. for each lens.
- South-Korean 8K VR mask (4K for each lens) :  
this mask offers the best resolution on the market, a 90 Hz  
refreshing rate, and a 200° FOV.  
2280 €
- PCTS upgrade to support 8K VR display.  
1080 €
- Semi-hydraulic pedal 1140 €  
A professional pedal that provides a more  
realistic feeling than every elastomer pedal.
- Professionnal elastomer pedal until 200 KG pressure.  
660 €
- Real-time and recorded Telemetry + 43 " monitor  
+ monitor stand : 1080 € H.T software option 320 €

### *PCTS GT Simulator*

- Double conversion Inverter + 2 quadruple IEC plugs :  
compensate tension losses, electricity cuts and  
micro-cuts in 1ms, to stabilize VR image and make the  
PC more reliable. Tailor-made amperage for this  
configuration. 595 €
- Tracker : It changes the orientation look  
in coordination with head moves. 480 €
- One extra software integration and parameterization.  
300 €
- 1 Wire Cover. 145 €
- 34" monitor stand without central bar. 96 €

Included Workforce in our prices :

- Windows and PC Installation and parameterization.
- One simulation software integration and parameterization.
- Display tune up within Windows and other applications.
- Peripherals integration and parameterization in every applications  
and software.
  
- Integral simulator assembly and Paris area transportation.  
Transportation outside Paris area is billed at 0,50 €/km.
- Desired tracks Integration and car setup on wished tracks.

Total without options

10 690 €
