- Keyboard and mouse with stand.
- Tailor-made PC with liquid cooling system.
- Semi-professional Fanatec pedals (elastomer), 90 Kg (180 pounds) loadcell on the brake.
- Rfactor2 :
a semi-professional simulation software : tyre and chassis flex, rubber deposit, dynamic weather conditions, accurate downforce...
- *Genuine Sparco* wheel on Thrustmaster base.
(cf higher photo).

Ultimate Vibe Systems

PCOS GT Deluxe Simulator

Options to complete the base model :

- Laser technology dynamic Platform (PCTS 1st page pic.) :
2000 components allows to moves your structure
on laterals rails to recreate G-forces and grip losses.
8040 €
- Compact actuators system engineered by a Airbus
and Nasa provider. 4800 €
- Triple Vibe system 2400 €
3 vibes sources are increasing the driver feeling
to reflect sound, G-forces and grip loss.
- Direct Drive wheel to gain reactivity, precision,
restitution subtlety. 2160 €
- 5K VR mask : 1560 €
This mask allows a 200° vision field,
a 180Hz refreshing rate, and a 2,5 K reso. for each lens.
- South-Korean 8K VR mask (4K for each lens) :
this mask offers the best resolution on the market, a 90 Hz
refreshing rate, and a 200° FOV.
2280 €
- PCOS upgrade to support 8K VR display.
1920 €
- Semi-hydraulic pedal 1140 €
A professional pedal that provides a more
realistic feeling than every elastomer pedal.
- Professionnal elastomer pedal until 200 KG pressure.
660 €
- Real-time and recorded Telemetry + 43 " monitor
+ monitor stand : 1080 € H.T software option 320 €

Ultimate Vibe Systems

PCOS GT Deluxe Simulator

- Double conversion Inverter + 2 quadruple IEC plugs :
compensate tension losses, electricity cuts and
micro-cuts in 1ms, to stabilize VR image and make the
PC more reliable. Tailor-made amperage for this
configuration. 595 €
- Tracker : It changes the orientation look
in coordination with head moves. 480 €
- One extra software integration and parameterization.
300 €
- 1 Wire Cover. 145 €
- 34" monitor stand without central bar. 96 €

Included Workforce in our prices :

- Windows and PC Installation and parameterization.
- One simulation software integration and parameterization.
- Display tune up within Windows and other applications.
- Peripherals integration and parameterization in every applications
and software.

- Integral simulator assembly and Paris area transportation.
Transportation outside Paris area is billed at 0,50 €/km.
- Desired tracks Integration and car setup on wished tracks.

Total without options

8 900 €
